Building Design Partnership

www.bdp.co.uk

BDP is an international, multi-discipline practice of engineers, designers and architects aiming to provide comprehensive, integrated design services for the built environment.

The Practice's mission is to be collaborative – working with customers, colleagues in construction, and the communities affected – aiming to be ethical and responsible to all stakeholders.

BDP Engineering is the group within BDP providing engineering services to clients, both on direct commissions and as part of a multi-disciplinary team.

The belief is that good design can create substantial economic and social value. BDP's areas of expertise include Arts & Leisure, Education, Healthcare, Historic Buildings, Housing, Industry, Offices, Retail, Science, Sport and Transport. There are over 900 highly skilled staff throughout the UK and elsewhere. To date, over 300 major design awards have been presented to the group.

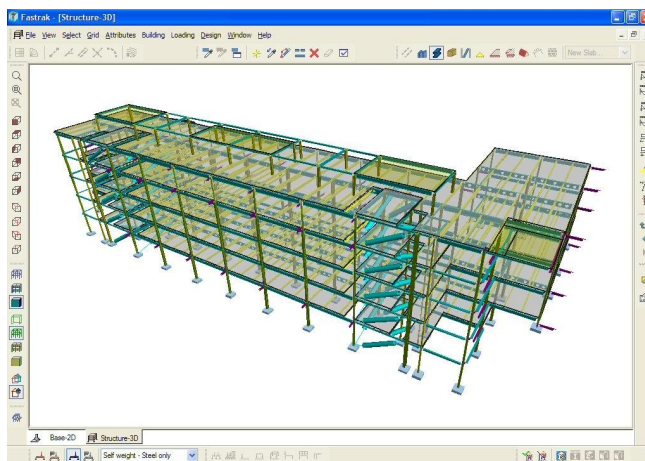

BDP employs a range of software, including CSC's Fastrak suite, and has recently utilized Building Designer on a number of projects. Initially Building Designer was used on the Warrington Collegiate campus redevelopment project – for the design of the steel framed Business School building. Subsequently the program has also been used on the Central Riverside office development in Sheffield.

“Building Designer provides economy of design process, as well as excellent visualisation for engineers and architects. Following the initial ‘learning curve’ BDP propose to employ Building Designer on similar future projects, and look forward to further developments of the program”

Major Fastrak Building Designer benefits to BDP

- ▶ Whether it is a simple mezzanine floor, a small building with a complex roof structure or a traditional multi-storey building, Fastrak offers you the greatest choice of design options, enabling you to provide the best solution for your clients.
- ▶ The software has an excellent reputation for quality, and it has become an industry standard for steel design to BS 5950 worldwide.
- ▶ CSC has a 30 year history of working with customers to support them in producing fast, effective and safe steel building designs.
