▶ Johan Greyling – Operations Director

▶ 1100 Tonne Platinum Concentrator Plant

A. Leita Steel Construction (Pty) Ltd –

www.aleita.co.za

A. Leita is a Pretoria based company in South Africa, established in 1968 and operating from a 13,500 sq m facility. Production capacity is currently being achieved at between 250 and 450 Tonnes per month of structural and architectural steelwork.

A. Leita implemented FabTrol MRP drawing and materials management in April 2000 helped by CSC, with on-site implementation. An upgrade followed in April 2002 with the addition of FabTrol MRP production followed in June 2003 with FabTrol's project management thus completing A. Leita's integration and management of all projects in FabTrol MRP

Major FabTrol MRP benefits to A. Leita Steel Const'n:

▶ Drawing Management

Comprehensive drawing management system records all drawing issues and movements with direct imports from 3D detailing systems.

▶ Materials Management

Efficient purchasing of materials, thanks to the industry's most efficient nesting engine that quickly evaluates nesting solutions from multiple suppliers based on lowest cost as opposed to least waste.

▶ Project Management

Close monitoring of all project costs and production progress along with re-measurement reports.

▶ Production and Shipping Management

Automatic scheduling of materials directly imported from 3D models avoiding any manual listing of materials.

Complete transport management system with detailed delivery load lists and trailer management.
